INSTALACIÓN DE 50 TUBOS FLUORESCENTES LED EL 6 DE FEBRERO DE 2017 EN IES HUELIN

Después de pedir y estudiar varios presupuestos de 50 tubos fluorescentes LED y su instalación elegimos el más económico y de reconocida calidad. El lunes 6 de febrero de 2017 el personal de mantenimiento instaló 50 tubos fluorescentes LED en la sala de profesores, distintas oficinas de la planta baja y el pasillo. Las características de los tubos instalados son las siguientes: ATMOSS lighting lynux series 1200 mm 270 18w 1730 Lumen 100/250v FP 0,90 luz blanca 5000k.

A partir de aquí procede hacer un estudio sobre el ahorro energético en la factura de la luz que supone esta medida de eficiencia energética, y posteriormente instalar más tubos fluorescentes LFD en el centro.

A continuación mostramos algunas fotos del día de la instalación de los primeros 50 tubos fluorescentes LED en el instituto Huelin de Málaga:
